CANADA REVENUE AGENCY CONFIDENTIAL INFORMATION

INTRODUCTION

While all preparers intend to transmit their clients' files free of error, mistakes sometimes occur as a result of keying errors or missing entries. One way to avoid errors is to review the data before it is transmitted to ensure that the file is correct.

The purpose of this chapter is to provide assistance to preparers in correcting records that are not accepted due to error conditions.

HOW ERROR CLUES ARE SET

Validations of electronically submitted batches are done in stages, meaning an electronically submitted batch must clear the schema validations before validations in the next stage are performed. Depending on the errors, an electronically submitted batch could also be rejected based on batch and form validities.

If there is a problem with one or more forms within the batch, only the forms with errors will be rejected and each problematic form within the batch will be identified, on a sequential basis, with the associated error clue message(s).

CANADA REVENUE AGENCY CONFIDENTIAL INFORMATION

RESPONDING TO ERROR CLUES

This chapter explains either the reason or the action required, or both, for the various error clues that you might receive. A batch can be retransmitted once the errors have been corrected.

When an error clue is received, you should be able to resolve the situation with the information contained in this chapter. However, if you encounter an error condition that is not covered, or if you need further clarification on the information contained in this chapter, call the EFILE Helpdesk in your local tax centre for assistance.

Before calling your EFILE Helpdesk, have all the relevant information concerning the applicable error clue available.

EFILE Helpdesks were established to help preparers and transmitters resolve technical matters related to the electronic filing process. Enquiries about whether you were updated to the Canada Revenue Agency (CRA) system as the representative or obtaining information on the taxpayer's account should be directed to Individual Income Tax Enquiries at 1-800-959-8281. The Helpdesk phone numbers are for the exclusive use of preparers and transmitters who are electronically submitting their Form T1013 (Authorizing or Cancelling a Representative) and must not be provided to individual taxpayers.

For error clues related to format, contact your software provider for assistance.

While software products may pass the CRA certification test, we do not test or review the products for user-friendliness. Any comments you have regarding your software product should be directed to the developer.

The error messages consist of 3 digit numeric characters preceded by the letter W or T (e.g.: W101 or T801).

Adherence to the following schema requirements and mandatory fields is required since error clues will be generated if the schema validations fail and/or mandatory fields are not input.

Mandatory field requirements are detailed in the XML schema document.

Please note that the new or modified error and warning message are noted in **bold font**.
